

Re: Woodlawn ARC: SSD-21184278

I object to this proposed development.

I object to this type of development when it has been banned in so many other places in Australia.

I object to millions and millions of litres of diesel being burnt transporting Sydney waste to be burnt in country NSW when we are trying to reduce emissions that contribute to climate change.

I object to a facility that will burn recyclable material when we are trying to increase the environmental benefits of recycling .

I object to Veolia operating a facility that could release, throughout the southern tablelands, substances that are harmful to human health and the environment. Veolia has a long and proven track record of being unable or unwilling to meet their obligations to control the odour from their existing Woodlawn facility, how could anyone trust them to operate a facility that could potentially release toxins and carcinogens.

I object to living with the fear that the facility could poison the air we breath, the water we collect from our rooftops and the food we grow in our soil.

I object for so many more reasons.

I acknowledge and accept the Department's disclaimer and declaration.

I have never made any political donations.
