358 Jugiong Road, Cootamundra, NSW, 2590

Woodlawn ARC: SSD-21184278

I wish to OBJECT to the above application

The areas that are predicted to be most impacted by this incinerator have amazing produce including, fruit and vegetables, truffles, honey, meats and wines to name but a few. How will this operation affect the products produced? Will these products be tainted by the chemicals emitted from the incinerator? Will they still be safe for human consumption? The livelihoods of these people are at risk and the potential impacts on them are detrimental. How can something that is going to emit such toxic chemicals into the atmosphere be considered safe? Don't impact on these communities and people who have worked so hard to build their businesses. Think of the potential economic losses to them.

I wouldn't want to continue to buy produce from this area would you? Don't forget the small businesses they have families to support too.

I have not made a reportable political donation.

I acknowledge and accept the Department's disclaimer and declaration.
