

NAME: POLICARPO SADUMIANO

ADDRESS: 6 Lily St., HURSTVILLE, NSW 2220.

NAME OF PROJECT: Woodlawn ARC: SSD - 21184278.

STATEMENT: I object to the application for a new incinerator in Tarago, NSW.

REASON: If established and then operated the nasty chemicals produced during the incineration of dangerous materials including biohazard materials from hospitals, home and commercial quantities of old pesticides, paints, batteries and the like, will vaporise at very high temperatures and rise up into the atmosphere. These various chemicals would chemically react with each other and with oxygen and produce various forms of compounds which may be of variable toxicities ranging from low toxicity to super or extreme toxicities, far too dangerous to humans and ecosystems. These compounds would not remain suspended in the atmosphere but will move and spread out over areas nearby or further away depending on atmospheric pressures and wind velocities. Then because these compounds aren't weightless, they will eventually settle down onto the earth surface, on plants, roofs of buildings, brought down by rainfall and will then contaminate town waters, water in dams, potable waters in tanks, catchment waters and not forgetting the irrigation waters on grazing and agricultural lands.

I wouldn't like to get poisoned because of the fact that I live nearby THE INCINERATOR in Tarago, NSW. The incinerator will have a working life of 30 or more years while the garbage tip that already exists in Tarago still has 25 years! NO, there is definitely no fair go in establishing this incinerator where so many people and their livelihood is at stake.

Please consider our plea, PLEASE NO INCINERATOR IN TARAGO.

POLITICAL DONATION: I have not made any political donation, reportable or not in the last two years.

ACKNOWLEDGMENT: I acknowledge and accept the Department disclaimer and declaration.
