

This is an objection to Project Woodlawn ARC: SSD-21184278 (The Tarago Waste Incinerator).

I object to this proposed facility.

It was refused permission to be built near Sydney, and if it is too dangerous to health there, the same issues most certainly apply to the Tarago region and its inhabitants (including me).

Plus we have the added issue that most of us are rural, and depend on rainwater tanks for our household and farming water. The particles generated by the incinerator WILL come into our airspace and will settle on everything, including our roofs, where it will be washed into our water tanks. The particles will also settle on our food crops and animals, and us.

I have not made any political donations to any political parties in the past two years.

I acknowledge and accept the Department's disclaimer and declaration.

Signed:
