

I am totally against any incinerator to be built here in casino nsw or anywhere else humans live.
It's quite simple stop the plastics all over the supermarkets with foods.
We can recycle other rubbish including old fruit and vegetables etc.
As a country of people who can work for the dole and people in jail's that can sort electric wires
timber etc etc turn it into vegie garden for old fruit and vegetables that can be used again in jail's,
hospital, nursing homes etc. As recycling and using the waste into great soils.
To be reused in market gardens, cattle feed etc etc
Wires and timbers can be reused for furniture etc.
So many different things it can be reused.
A government can sit down get people who have to pay off traffic fines a few days a week, jails
where the people in doing their times doing something useful.
But to poison our air, we have the rights to clean health air.
The neo plastic particles floating in the air will go into all animals feed, organic farming destroyed in
Australia
The water ways for drinking healthy water.
Our rivers our oceans are full of plastic now.
Do we need to kill ourselves with it with the air we breathe ?
The meat and vegetables you will eat will have those plastic particles in it.
All causing cancer.
We need to say NO we want our children and grandchildren to live in a great healthy country not
polluted like other countries ever.
Please stop think not everything is worth \$\$
You cannot buy your children health or yours.
