

Name: Elizabeth Standley

Address: 13 Avalon close, Bellbird Park, QLD 4300

Project name and application: Woodlawn ARC: SSD-21184278

My name is Elizabeth, and I live in Brisbane. I completely object to Veolia's proposed incinerator being built in Tarago.

My sister and 4-year-old niece live in Collector, NSW - 20km from Veolia's proposed incinerator.

I believe that Veolia's toxic industrial waste incinerator will poison the environment in which my sister and niece live with pollutants such as lead, mercury and forever chemicals such as dioxins. It's scientifically proven these chemicals harm women's and children's bodies. Their only source of water is tank water, for crying out loud! The only acceptable level of these chemicals in humans' bodies is ZERO.

If the NSW Government believe waste-to-energy incinerators are safe, then why are they not building it in Sydney at the source of the waste? Why is the NSW Government allowing so much energy to be wasted shipping these millions of tonnes of garbage for such a long distance out of Sydney during a climate emergency?

I would like to know the TRUTH behind the reason NSW Government chose Tarago as a site for an industrial incinerator to burn Sydney's garbage. The Tarago location is surrounded by prime agricultural land and just 5km from a primary school.

There is no place in Australia or a true circular economy for a toxic garbage-burning incinerator.

I, Elizabeth Standley, acknowledge and accept the Department's disclaimer and declaration.

I, Elizabeth Standley, declare I do not have any reportable political donations you have made in the last two years.
