

I, Gregory Forrest, of 526 Mount Fairy Road, Mount Fairy NSW, object to the proposed waste incinerator at Woodlawn (Woodlawn ARC:SSD-21184278)

The reasons for my objection are as follows;

1. The proposed incinerator is not 'green', as stated by Veolia. It will contribute significantly to climate change, and it's energy supply capability is insignificant compared to renewables. It will create more pollution than coal.
2. The environmental impacts of this incinerator are significant. It will pollute our drinking water, land and local produce. It will create an unsafe environment for children and families living in the local area.
3. The economic impacts will be negative, and significant. It will affect farmers' incomes, visitor numbers, and real estate values. We are close enough to Canberra and Goulburn, with plenty of industry and many jobs available.
4. Veolia have a proven poor record of environmental mismanagement, and will behave no differently if this incinerator goes ahead. The ramifications for our town, however, will be devastating.

I acknowledge and accept the planning department's disclaimer and declaration.

Regards,

Gregory Forrest
