

My name is Jamie Miles, and we live in Goulburn. We have recently built a house here for our family including small kids, and as such, I strongly object to Veolia's proposed incinerator being built in Tarago.

I don't see the incinerator as necessary - there are much better and cleaner ways to deal with rubbish, and certainly this volume of rubbish.

I don't think that incineration is the best method of rubbish disposal at all, especially when we have excellent recycling systems available.

From all the information I can find on incinerators in general, and this incinerator specifically, I don't think this is a good idea environmentally, despite the EPA's manifold exceptions. The objections raised by the locals far and wide around the proposed site and the toxicity of the output should also be taken into consideration - this is not a small thing! Please listen to the community who is united and vehemently opposed to this!

Regards,
Jamie Miles
