Dear Sir/Madam,

How are you. It is very good for William Clark College to operate to allow students more knowledge and education. However, please consider building a parking lot for students and students' parents to collect and drop of their children.

As there has been several times before the start and finish of school hours where these students and parents are queuing to either drop of or pick up the children and blocking the residents on Wrights Road from entering their own drive ways during these times of day. They are also parking out the front of our houses on the curb which you can imagine causes difficulties for the residents to utilize when they have visitors or needs to use this themselves. This is causing issues for the residents to get to work and home on time. I my self have to pick my grandchildren up from another school and the long queuing causes me to be delayed to do this, on more than one occasion. I am also concerned as if what happens if there is an emergency of some sort and the ambulance or fire brigade need to access residents' homes on Wrights Road and can not do so due to lack of parking available for students and their parents.

If the school made a parking lot for these students and parents it would not only benefit the school's safety issues for their students but would also be beneficial for the residents of Wrights Road and relieve stress caused to the residents of Wrights Road attempting to access their properties. This would be appreciated extremely by the residents of Wrights Road.

Thank you for the time and I hope you consider making the change for both the school and the residents.

Kind regards

A resident of Wrights Road.
