My submission is as follows:

- The project is green, the use of solar panels, water N-US, how the buildings are sited, the amount of space given to tree canopies. This is a good thing and further supports the environment.
- The project further supports and enhances activities close to the site that would have a clear public benefit such as re-instating the sea baths & the installation of BBQ-facilities supporting the general public in the local area.
- The project enhances tourism to the area. Currently the area is in need of suitable accommodation and the new proposal would enable and will fill the requirement for tourism, guests, VIP's and others.
