

I SUPPORT THE WINTERBOURNE WIND FARM PROPOSAL

IDSSD-10471

THE REASONS BEING:-

- WIND ENERGY IS FAR CHEAPER THAN FOSSIL FUEL GENERATION, WITH NONE OF THE AIR, WATER AND LAND POLLUTION.
- THERE IS AN URGENT NEED TO REPLACE AGING FOSSIL FUEL PLANTS IN N.S.W AND AUSTRALIA, WITH ARMO FORECASTING 60% OF THE EXISTING COAL GENERATION WILL BE WITHDRAWN FROM THE ENERGY MARKET BY 2030
- NSW GOAL IS TO HAVE 50% REDUCTION IN GREENHOUSE GAS EMISSIONS BY 2030 (RELATIVE TO 2005 LEVELS) AND WE ARE NOWHERE CLOSE TO THAT
- THIS PROJECT WILL PROVIDE ABOUT 3% OF THE GREENHOUSE GAS EMISSIONS REDUCTIONS REQUIRED TO ACHIEVE THIS GOAL
- THE PROJECT WILL SEE HUNDREDS OF MILLIONS OF DOLLARS SPENT IN REGIONAL N.S.W., CREATING JOBS AND SKILLS FOR THE FUTURE ECONOMY.
- THE PROJECT WILL DELIVER \$1 MILLION UPFRONT CONTRIBUTION AND 750 000 PER ANNUM TO A COMMUNITY BENEFIT FUND FOR THE WAREHA AND URAMA COMMUNITIES.
- UP TO 400 JOBS CREATED DURING CONSTRUCTION, AND 16 PERMANENT OPERATION JOBS.
