To Whom it may concern,
RE: WINTERBOURNE WIND FARM APPLICATION NO.SSD-10471

I am making a submission **in support** of the Winterbourne Wind Farm because I think:

1. We need to have renewable energy as the coal fired power stations close down to give us a reliable energy supply.
2. The project will bring income into the community to help community projects such as sporting events, scholarships and grants to improve community infrastructure.
3. The Wind Farm project will bring increased income into town for businesses especially during the construction phase, including food, accommodation and local contractors.
4. Our rural roads will be updated and improved as they need to be able to handle heavy equipment.
5. The project will provide potential for increased employment opportunities in the district.
6. The host wind turbine farmers will have increased opportunities to manage pastures on-farm due to an increased network of on-property roads.
7. The project may provide employment and apprenticeship opportunities for my children as they leave school.

Yours Faithfully,
