To Whom it may concern,

RE: WINTERBOURNE WIND FARM | APPLICATION NO. SSD-10471

I am making a submission in support of the Winterbourne Wind Farm project because I think:

1. We need to stop the earth heating up because the extra heat is causing global warming which is creating more intense droughts, bushfires and flooding.
2. The project will bring extra income for my family which will help them cope with future droughts and fires.
3. The Winterbourne Wind Farm will help my parents pay for my education.
4. Electricity is very important for Australia's future prosperity, and we won't have a good electricity supply if we don't build renewable energy projects urgently.
5. The income that my father will earn from the Winterbourne Wind Farm could help him to become a full-time farmer as my father works in a job off farm and he would love to come back to the farm permanently.
6. The income from the wind farm will help me and my brother with our future careers.
7. The money that the Community will get to help with community projects will make a big difference to our town.
8. The projects could provide jobs for me and my friends when I leave school.

Yours Sincerely
