RE: WINTERBOURNE WIND FARM APPLICATION NO.SSD-10471

I am making a submission **in support** of the Winterbourne Wind Farm because I think:

- We are in a prime location to have wind turbines as they are not invasive and suit our environment.
- Having wind turbines is promoting clean, climate smart energy and reducing constant pollution from burning coal.
- The project covers the importance of sustainability. Having windfarms in Walcha is the right way for a strong renewable energy hub that will flourish for many years to come.
- The township of Walcha will benefit from the income that the wind project will produce, it will create employment and training opportunities for young people and bring an influx of people to support businesses, council stability and education.
- We need to be moving forward with renewable energy and wind power as a source of energy. It is important for our country's future to have reliable power and this will put Walcha on the map.
- Winterbourne Wind Farm is going to be a positive project for the township of Walcha.

Yours Sincerely
