

Letter of support for the Winterbourne Wind Farm (proposal ID SSD-10471).

Dear Sir/Madam,

I am writing to express my support for the proposed Winterbourne Wind Turbine Project in the Walcha Region. I strongly believe that this project will bring a multitude of benefits to both the local community and the environment.

First and foremost, the project will significantly contribute to the reduction of greenhouse gas emissions and the fight against climate change. Wind energy is a clean and renewable source of electricity, and the project will help to decrease the region's dependence on fossil fuels.

Furthermore, the project will generate economic benefits for the region. It will create jobs during the construction and operation of the turbines, and will also attract investment and tourism to the area. In addition, the project will provide a source of income for local landowners who have agreed to host the turbines on their property.

The local community will also greatly benefit from the project. It will provide a source of clean and reliable electricity, which will help to support the growth and development of the region. The project will also provide educational opportunities for local students, and will help to raise awareness of the importance of renewable energy.

In conclusion, I urge the Department of Planning and Environment to approve the Winterbourne Wind Turbine Project. The benefits it will bring to the environment, local community, and economy are undeniable and this project is a crucial step towards a sustainable future for the Walcha Region.

Thank you for considering my submission.
