
Letter of support for the Winterbourne Wind Farm (proposal ID SSD-10471).

I am writing to express my support for the proposed renewable energy project by Winterbourne Wind in the Northern Tablelands of New South Wales, near the Town of Walcha. This project has the potential to bring significant benefits to the local community and the broader region, including:

- Reducing greenhouse gas emissions and contributing to the transition to a low-carbon economy
- Generating clean, sustainable energy for local residents and businesses
- Creating jobs and economic opportunities in the area
- Improving energy security and reducing dependence on fossil fuels

I believe that this project aligns with the state's goals for renewable energy and sustainable development, and would be a valuable addition to the region's energy mix. The location is ideal as it is close to transmission lines and has good wind and solar resources.

I urge the NSW Government to fully consider the benefits of this project and to give it your full support. Thank you for your time and attention.
