Attn Iwan Davis

Winterbourne Wind Farm ssd-10471.

I OBJECT TO THE WINTERBOURNE WIND FARM PROPOSAL.

Walcha and surrounding district do not want wind turbines .

I am a property owner and to start with on high quality agricultural land I don't want roads all over my grazing land with power lines criss crossing across the land Where I want to be able to super.

And if there is a fire how can IT fight them from the air with a no fly zone.

The roads around Walcha now are in poor condition and with more trucks and traffic on them we will be back to gravel roads, and as far as gravel is concerned we do not have enough in our district now for road repairs.

If people in the city won't to change the climate and have renewable energy then put the wind turbines near them and see how they like it.

Don't forget where your food comes from.

Don't put wind turbines in our district lots of people would have us eating lettuce leaves instead of a good balanced diet of meat, bread fruit and vegetables.

WRONG PLACE

AND WHO IS GOING TO CLEAN UP THE MESS WHEN THEY ARE DECOMMISSIONED.
