

Dear Sir/Madam,

10/1/2023

I fully support the proposed (above) Winterbourne Wind Farm.

My husband Peter and I have four children (adults) aged between 28 and 34. They, and their children are our future and it ~~is~~ ^{is} for them and our state's future energy needs that we are willing to be a part of this project.

I believe that the only way forward is to phase out the use of coal and turn to greener alternatives such as this Wind Farm.

With rising power costs we need to act quickly to provide cheaper and cleaner energy sources for our State.

This project has been in the pipeline for many years and all of the planning stages have been meticulously researched by people who are well-educated in this field.

Please don't let public hysteria by a minority of people (who have proven to spread misinformation) stop this State Significant Project!

Sincerely, Linda Lockyer
