

Letter of support for the Winterbourne Wind Farm (proposal ID SSD-10471).

I Michael Schaefer are in full support of the Winterbourne wind project. I believe this is a exciting opportunity for the Walcha Community and feel this project will give Walcha a more prosperous future than it currently has with a declining population and increases in the cost of living.

The Winterbourne wind project will ensure a income for many years and will be a safety net for primary producers in a volatile agricultural market.

As a sheep shearer it is extremely important that primary producers are financially stable. This will have a "trickel down" affect for all agricultural workers (i.e. new shearing sheds and safer work condtsions.)

Not to mention the fact that NSW needs a reliable source of ~~etc~~ electricity to keep its economy competitive regardless of climate change.
