Director - Energy Assessments.
Planning & Assessment
Dept. of Planning & Environment,
Locked Bag 5022
Parramatta, NSW. 2124

Dear Sir/Madam

I enclose 14 letters written in support of the Walcha Wind Farm. All these letters are written by friends of mine who have lived in Walcha or have visited here frequently. I also include my own submission written in support of this very worthwhile project.

If perchance you come across any duplication, I take responsibility. Quite a few of my friends had trouble with on-line submissions & may have given up or got duplicated by me. Sorry! I desperately hope that your Department will vote in favour of this project for the good of NSW electricity supplies & our little town.
Yours faithfully,

9 Jan 2023

Re Winterbourne Wind Farm Application Number: SD-10471

I am writing to offer my full support to this project.

Daily events around the world tell us that Global Warming is happening
Fossil fuels are on the way out (not quickly enough) and we need renewables to replace them.

Winterbourne Wind would supply a lot of electricity to the NSW grid.

Would help the NSW government's goal of net zero emissions by 2050.

Would be of huge economic benefit to revitalise Walcha.

Would bring employment opportunities to the whole region.

Businesses, and accommodation would benefit.

Diversified income to help survive the next drought.

Provide financial benefits to the local community via the Community Benefit Fund.

Help remove fear of amalgamation.

Will bring young families to Walcha and help balance the aging population.

Opportunities for local contractors and businesses.

I really do hope that Winterbourne Wind will go ahead. This project will bring enormous benefits to electricity consumers, Walcha community and the NSW Government, and many others.

I do not want my submission on the NSW portal and I acknowledge and accept the Department's disclaimer and declaration.
