Wintrebourn Wind Project:

I am a long term resident of the Walcha region. My wife and I run a small grazing operation. I am not opposed to renewable energy concepts if they are practical but I am completely against the proposed Wintrebourn Wind Project.

In the interests of brevity I fully concur with the 20 points raised by the Motion for Walcha - delineating flaws, discrepancies and false information in the E.I.S.

What is patently obvious from both local and overseas failed wind farms is that wind turbines are sourced from questionable materials and are dubious unreliable products of greed.

I believe the Wintrebourn Wind Project is a transparent attempt by an overseas company to make a quick capital gain and leave.

I am particularly concerned by the inadequate planning for the expensive and damaging decommissioning process, the long term damage to the environment and the poor site selection.

Yours faithfully
John J. Casey
