Letter of support for the Winterbourne Wind Farm (proposal ID SSD-10471).

To whom it may concern,

1

I wish to show my support for the Winterboune Wind Farm project proposal. I believe that the benefits of the project outweigh any negatives.

I believe that it will not only benefit those property owners involved in the project, but the Walcha Community as a whole. For the community, the opportunity for both short term and long term jobs is invaluable. Expanding the diversity of job opportunities in Walcha strengthens the ability to attract people to the town.

The issue of roads and infrastructure should be seen as an opportunity. The need of the project to have quality infrastructure, especially during construction, is important. The improvements in these plus the opportunities in the construction will benefit many.

The project in my opinion, will be good for Walcha, the landholders and for our Electricity grid.
