Letter of support for the Winterbourne Wind Farm (proposal ID SSD-10471).

---

I believe the Winterbourne Wind Farm offers unparalleled opportunities for the Walcha and surrounding communities. The significant financial support offered through the Community Benefit Scheme, will provide such communities with incredible annual funds to continually improve infrastructure. Locals will benefit from improvements to sporting facilities, community venues and roads. Such improvements will also result in increased work for local contractors ensuring the local population remains stable or increases due to work opportunities. Any people employed from outside the local area will also spend their earnings in the local shops, food and accommodation venues. This project will not only provide the community with money but will ensure the money stays in the community.
