

---

I am writing to express my support for the proposed Wind Farm project ID SSD-10471 to be run by Winterbourne Wind Pty Ltd and developed by Vestas in the Walcha district of New South Wales.

I believe that this project has the potential to bring significant economic, environmental, and social benefits to the local community, including farmers and host landowners. The construction and operation of the wind farm will create jobs and stimulate economic growth in the area, and local businesses will benefit from increased spending by workers on the wind farm. Host landowners may also benefit from lease payments for the use of their land for the turbines.

In addition, the wind farm will produce clean, renewable energy, which will help reduce greenhouse gas emissions and improve air quality. This will contribute to a more sustainable future for our community and the region.

Furthermore, the project will also have positive effects on the community by improving infrastructure, educating and training local residents and providing opportunities for local suppliers and service providers.

I strongly believe that the Winterbourne Wind Farm will be a great asset to the community and I urge the NSW Department of Planning to give this project the necessary support and consideration.

Thank you.
