

Letter of support for the Winterbourne Wind Farm (proposal ID SSD-10471).

I support the construction of the Winterbourne Wind Farm.

I caught up with Doug Handlar at the Walcha Show in 2021 whilst visiting friends who are land holders associated with the Wind Farm.

I was very impressed with Doug's knowledge of the community and the positive effect that a development of this size would have on the town of Walcha and the New England Region.

I truly believe that if action isn't taken to implement renewable energy immediately then the State will run out of reliable + affordable electricity.

We need to look to the future for the sake of our children + grand children.

Lyn Maxwell
