

I am writing to express my support for the Winterbourne Wind Turbine Project (ID SSD-10471) in the Walcha Council area. As a concerned citizen and advocate for sustainable energy, I believe this project has the potential to make a significant contribution to the community's efforts to transition to clean, renewable energy sources.

The Winterbourne Wind Turbine Project has been designed to minimize any negative impact on the local area, and its benefits will be felt by all residents in the form of reduced greenhouse gas emissions, lower energy costs, and increased energy security. In addition, the project will create jobs and stimulate economic growth in the region.

I believe that the Department of Planning and Environment should give this project their full support, and I urge them to take all necessary steps to ensure its successful completion. I would also like to point out that this project is in line with the state and country's plan for renewable energy adoption which will help combat climate change.

Thank you for your consideration.
