

I am writing to express my support for the proposed Wind Farm project, ID SSD-10471, to be run by Winterbourne Wind Pty Ltd and developed by Vestas in the Walcha district of New South Wales. I believe this project will bring significant benefits to the local community and the district as a whole.

The project has the potential to create jobs and stimulate economic growth in the area. Local businesses will benefit from increased spending by workers on the wind farm and the farmers and host landowners will benefit from lease payments for the use of their land for the turbines.

In addition, the wind farm will produce clean, renewable energy, which will help reduce greenhouse gas emissions and improve air quality. This will contribute to a more sustainable future for our community and the region.

Furthermore, the project will also have positive effects on the community by improving infrastructure, educating and training local residents and providing opportunities for local suppliers and service providers.

I strongly believe that the Winterbourne Wind Farm will be a great asset to the community and I urge the NSW Department of Planning to give this project the necessary support and consideration.
