**Letter of support for the Winterbourne Wind Farm (proposal ID SSD-10471).**

---

I am writing to express my support for the proposed wind turbine project by Winterbourne Wind in the Walcha region. This project has the potential to bring significant environmental, community, and economic benefits to the area.

Firstly, the use of wind power is a clean and renewable energy source that can help to reduce greenhouse gas emissions and combat climate change. The project would generate electricity without the release of harmful pollutants, which is essential for a sustainable future.

Secondly, the project would provide significant benefits to the local community. The construction of the turbines would create jobs and stimulate economic growth in the region. Additionally, the project would provide a source of revenue for the local community through the payment of rates and landholder agreements.

Lastly, the project would have a positive impact on the economy of the region. The turbines would generate electricity at a lower cost compared to fossil fuels and would reduce the dependence on fossil fuels, which would have a positive impact on the local economy.

In conclusion, the proposed wind turbine project by Winterbourne Wind in the Walcha region would provide significant environmental, community, and economic benefits. I strongly support this project and urge you to approve it.
