**Letter of Support for the Winterbourne Wind Farm (Proposal ID SSD-10471)**

**I support the above Winterbourne Wind project for the following reasons:**

- **We are contributing to reducing green house emissions**
- **I would like my lights to stay on when the coal powered stations cease operation**
- **Renewable energy seems to be the way forward and Australia need to adapt to what every other country in the World already have in place.**
- **The proposed community fund seems reasonable and would benefit the whole community.**
- **Our roads would be improved to cater for the amount of vehicles from the development using them.**
- **The amount of job opportunities would be beneficial for the town.**
- **Extra disposable income in town will be spent locally.**
- **General services in town will benefit in construction: hotels, motels, food outlets, service stations etc.**

**I think the town needs an industry and what a great opportunity for a small rural town. If we don't diversify and make changes to the way we live, we will be left behind in the global renewable energy race.**
