Re Proposed Solar Plant at Glanmire

Dear Sir.

I am a very close neighbour to this proposed Solar Plant, and I was also a near neighbour of another such proposal, several years ago, at Brewongle. I am, and have been very closely involved in opposing both proposed developments.

My first objection to the Elgin Energy proposal, is based upon the fact that the land in question is top quality, agricultural land, and as such, should surely be preserved for food production, in particular, grain production.

With the current world wide shortages of food, we have a moral obligation to preserve such land, for our nation's and the world's, food security.

My second, and I believe, equally important reason for objection, is the effect that I have seen such proposals having upon the mental health of the people who are, potentially, to be affected by this Solar Plant.

People in this district are philisofically, 'green', and attend to their land in such a way as to preserve the integrity of the land, and the environment. We, personally, have spent thousands of dollars in conservation work-land and soil conservation, fencing off creeks to prevent stock degrading the banks, the planting of thousands of trees. We are genuinely and practically involved with our environment.

We in this community, have put our life's savings into our properties, and now fear we run the risk of losing a lot of money, as land prices will surely fall, if the Elgin Proposal goes ahead.

This, along with the stress involved in opposing this proposal, is causing a lot of mental anguish to those closely involved.

Glanmire is the gateway to the Central West, and to the historic city of Bathurst. Such a development, would be a blight on the landscape, not only of Bathurst, but the State of NSW.

I ask you to please take our worries and objections seriously, and to send this proposal to a more appropriate location.

Yours Faithfully

Denise Hennessey
