

# HILLS of GOLD WIND FARM

APPLICATION No SSD - 9679.

The construction of the wind turbines in the Nundle district would be a great asset to the community. Apart from creating extra work opportunities the town would benefit by the income circulated by the workers.

Nundle once benefitted by having a bakery and a butcher to serve the locals. Now townsfolk shop elsewhere and tourists coming to the caravan park bring their supplies with them. Visitors could be adding dollars to the town and the small businesses could remain or new ones even be attracted to set up.

Nundle has been in decline for years and would only benefit from the extra people setting up home there.

The wind farm providing clean energy is a benefit for all not just the Nundle residents.

I am a firm supporter of the Hills of Gold Wind Farm.

I have never made any political donations in the past two years.
