

HILLS OF GOLD WIND FARM

APPLICATION NO SSD - 9679.

This is a statement of "support" for the Hills of Gold Wind Farm to go ahead.

The wind farm to be constructed near Tundale can only be a plus for the area.

The extra workers and families would be a boost to the local economy. Tundale cannot survive without new residents setting up homes. The local school needs pupils to attend to keep enough students there to keep it open. This saves children a long bus trip to attend a school.

More tourists would be attracted to the area. A wind farm further north has bus tours to its farm and the local economy has grown with more people employed.

Tundale could do with a boost to the small businesses.

I feel sure all environmental factors will be considered and adhered to and therefore I fully support the Hills of Gold Wind Farm being approved and constructed to provide clean energy.

I have not made any political donations in the last two years or ever.
