SUBMISSION FOR SUPPORT

I am supporting this project for various reasons and I think this is a step closer to better energy solutions.

As population continues to ~~grow~~ grow, energy for everyone must be able to keep up.

Coal is a reliable source of energy, but not the solution we need. As we all know, the mines are a huge blemish in the earth.

As society moves to a mindset of looking after the planet, coal mines will become less & less used. Something must take up the slack. We can't get rid of coal if there is nothing to replace it. We must get other energy. I see no genuine reason as to why this shouldn't go ahead.
