**Submission for objection page 2**

I object to the removal of street trees in the village of Nundle, the modification of the intersections, the proposed removal of one of the houses on the intersection of Jenkins and Innes streets. We need more houses in Nundle, not less. I object to the traffic congestion and delays it will cause to the locals. I object to the establishment of "no parking" zones, we are limited in parking options already.

The aesthetic value and the beauty of this village will be destroyed forever. As visitors and locals drive into the village we all admire the beauty of this location, the backdrop of the mountains and the tree lined streets, especially in autumn. This is the image we all have in our minds when we think of Nundle. All this will be ruined.

The amount of effort and money that went into promoting Nundle as a tourism destination and a quiet heritage village, is now at serious risk.

This is hard to understand, the arrogance of this international company who think they can come and wreck havoc in our community like this and ignore our little township. They are saying that this project is located in an isolated location, but it is not, and they propose to bring all large vehicles and construction traffic through residential streets.
