SUBMISSION FOR SUPPORT

I am supporting the windfarm because I think it would be an asset to this district's diversity and growth in population, and its main aim and contribution: supporting the production of renewable energy.

Australia has been ignoring climate change, ignore the scientists advice to reduce emissions. 2009 Victoria had 37° heatwave, this was an eye opener to a lot of people, devastating bushfires. Then in 2019 the worst bushfires Australia has ever seen. The government needs to stop bowing down to sceptics and go hard into renewables: windfarms, and solar, and hydro electric.

The windfarm proposal here in Nundle will support the maintenance of population in the district. This area needs people. There are many jobs unfilled here. This in turn will support school, preschool, volunteer groups, shops etc.

The windfarm placement at Hanging Rock is an ideal spot. Anyone who's been up on that ridge would see how its far enough from any towns and houses to encroach on peoples lives.

Nundle and Hanging Rock people would be proud to have this windfarm built here. It would demonstrate to the rest of the district how we can support new and innovative technologies in the bush, and support Renewable Energy into the Future.
