Background:

Starting in 2021, a series of yarns took place with Darug Knowledge Holders to establish an emerging narrative for the site and translate them respectfully into various integrated approaches for the Nawree project. This knowledge has been integrated into Group GSA's report which underlines the teams commitment to incorporating Darug design vernacular.

Purpose of this letter:

This letter is a show our intent to continue these conversations and further establish Dartug design vernacular within the project through co-design with Knowledge holders with regards to:

- art and place making interventions. Input into the cultural spaces within the project, such as yarning and story telling spaces.
- Continues engagement with Knowledge holders for other cultural activities appropriate to the facility, such as NAIDOC day celebrations, smoking ceremonies for start of construction and on opening day
- WSP's Indigenous Specialist Services are committed to continuing facilitation of these engagements if required.

Regards

Michael Hromek Brown (Badawang, Yuin)

Project Manager

WSP

A handwritten signature in black ink that reads 'M Hromek'.
