Notes

In terms of Sydney Airport's protected airspace, this project was first assessed & approved by the Federal Government in 2017 to a maximum height of 166.3m AHD.

The proposed development was reduced in height to 153.7m AHD in 2020. At tthe time we advised that the Federal aagovernment approval was still valid. Now in 2023, the proposal has grown to a new height of 170m AHD.

At this increased height, the proposed development would be subject to assessment and a determination made by the Federal Department of Infrastructure, Transport, Regional Development, Communications and the Arts.

Please advise if you wish the assessment process to proceed.
