Arizona Rd CHARMHAVEN

Dear Sir,

I am writing to protest above proposal by St Phillips Christian College at Charmhaven. This will decimate about 100 acres of bushland which includes one of the last stands of scribbly gum forest, varied flora including native orchids and fauna including kangaroos, possums and many native birds who will again be displaced and fighting for territory, including swift parrot (endangered) recovery on site. A lovely bushwalk area.

This school is not needed in the area as another 26 schools are already within a $\approx$ 10 km radius of the proposed site. It would cause traffic chaos on already overstressed/choked roads in this area.

In conclusion, as a local of this area, a development of this scale would prove, in my opinion, detrimental to the community as well as what small swathes of bushland we have left on the central coast to accommodate what wildlife + flora we have left.

Thankyou for your consideration
