

I object to Central West Orana REZ Transmission

Comments:

Coalabah is a very rich agricultural area with land often being held for long periods of time. To have your land forcibly acquired by a government run agency amounts to stealing. I don't see people in the suburbs of Sydney having to give up their homes, livelihood and income so why should we if these transmission lines are so safe why is there so much conjecture with radioactivity/cancer links. This doesn't even touch on the visual and vegetation destruction that will occur. Again one Rule for landholders and another for the big FOREIGN owned companies who destroy our natural vegetation and habitat of many species - both endangered and not endangered. I **FIRMLY AND UNEQUIVOCALLY OBJECT** TO THIS PROJECT.
