10/3 hill st  
COOGEE, NSW. 2034

I am objecting to the proposal:  
Yes

My name is Glen Philpott

My family and i visited the gardens of stone over many years, We would be very disappointed if the gardens and surrounding areas were to be damaged in any way.

We only just found out about the proposals, and feel the length of time is very short for people to comment.

Any modifications should be part of the Angus place west proposal, If it is truly a Conservation area, water should not be pumped into the cox river catchment area bypassing the reverse osmosis treatment facility.

The 2018 modifications angus place mod no. 5 has caused many streams to dry out as we have observed. This will surely affect the flora and fauna of the reservation area.

As coxs river is part of sydneys drinking water catchment, these modifications should not proceed.

Thrse modifications must be assessed under federal environment law.

I can recall many instances of failed safety standards from centennial mines over the last 12 yrs or more, the companies Eis reports should be taken with a grain of salt.

The large expansion of water needed for the Angus place and springvale mines, should be thoroughly examined by an independent group of experts.

A handwritten signature in black ink that reads "G. Philpott". The signature is written in a cursive, slightly slanted style.
