Subject: Proposed Plasrefine Plastic Recycling Facility 74-76 Beaconsfield Road Moss Vale 2577 - SSD-9409987
Date: Monday, 30 October 2023 3:20:18 PM

I wish to express my strong opposition to the Plasrefine Development Proposal.

I am a resident of Moss Vale.....it's JUST NOT THE RIGHT SITE.

The location is far too close to the town. Far too close to residential areas and schools.

It's such a toxic facility and incredibly dangerous.

This facility has a raft of impacts on the environment e.g. impact on the water system and rivers with toxic waste.

Noise impact and traffic congestion with the amount of trucks running 24/7.

I am most concerned about plastic particles into the environment. Studies being done around the world express that has become a huge problem.

There is also concern about fire. Recently several of this type of facilities have burst into flames.

I believe the operators of this proposed facility have no experience in Recycling Operation. Concern also that the operator is actually a Chinese family residing in Beijing and have a reputation of being known polluters. Not a good look.

In closing, not one person in the communities of the Southey Highlands wants this facility in the area. They also feel it poses a huge threat to the environment and is a huge health hazard.

Yours sincerely
