Opposition to Proposed Plasrefine Plastic's Recycling facility in Moss Vale

The community is getting extremely frustrated with the lack of support from the Planning and Environment Department regarding this proposed recycling facility in Moss Vale. It is absurd that the community interest are ignored as we do not want this proposed recycling facility near schools and residential area. The traffic in the Highlands is already at breaking point and with proposed extra trucks the roads will not be able to cope. The Council are unable to keep up with repairing current roads.

We understand Plasrefine has no experience in plastic recycling and why gamble with the community lives and keep our environment clean, safe. This is certainly not the right area for this proposed development for so many reasons.

Our region is the water catchment for Sydney and some homes rely on tank water with dams for stock all will be suffering from toxic air and water borne chemicals.

We do hope that the Department of Planning and Environment show our community the respect we deserve and reject this proposed facility. Thank you for the opportunity

yours sincerely
John Gorman.
