FW: Birriwa Solar Farm, Amended Application - SSD-29508870 OBJECTION
SUBMISSION

I Object to the 600MW Birriwa Solar Electricity Generating Works & 600MW/2hr BESS Amended Application - SSD-29508870 at Dunedoo as Industrialised Solar should NEVER EVER be on any Agricultural Land or anywhere in Australia at all as it is irreversibly contaminating, reliant on Unethical Supply Chains & would hardly ever provide power - with only a totally hopeless 25 Capacity Factor.

How foolish is that!!

We must have Australian Coal & Nuclear Power NOT Solar/Wind ruination!

A 1200 + another 500 random worker influx near Gulgong or anywhere in the Central West is crackers & very dangerous!

It would be an ENORMOUS PUBLIC HEALTH & SAFETY RISK!

That useless token of water tanks does nothing to address the Extremely Dangerous, Extremely Toxic Fire/Smoke Hazard Risks that are being forced on Rural Families AGAINST OUR WILL WITH NO SOCIAL LICENCE!
People will die because of this!!
