Applicant:

Not listed – why not?

TO WHOM IT MAY CONCERN

I object to the above as renewable energy is hazardous and will contaminate regional environments and may catch fire and cause toxic smoke and asthma and asthma-like health hazards in that event.

It is a myth that “renewable” energy is better. It is NOT better or CHEAPER than coal-fired base-load power by any stretch. This is also a national security issue when our services and assets are owned offshore.
