

Appendix 1: Transference of impact from large scale emission point sources

There will be Air Quality Impact. This will not be confined to the immediate locale of Warkworth, nor of the Hunter Region. This is the evidence provided by an expert witness who presented to the NSW Legislative Assembly Committee on Environment and Planning enquiry into the sustainability of energy supply and resources in NSW. Here is the extract from the transcript which provides clear evidence that any form of electricity generation based on combustion

Evidence of: Dr Tait, member, Core Group, Ecology and Environment Special Interest Group, Public Health Association of Australia in transcript of committee hearings 26th August, 2020:

“The EFA Report The health burdens of fine particle pollution from electricity generation in NSW, that Ben Awald did at the end of 2018, actually shows that a lot of the air pollution in Sydney comes from the Hunter Valley power stations. We are not just talking about adverse health consequences for people in the Hunter Valley from Hunter Valley power stations; we are actually talking about people down the whole east coast.”
