

Sydney Water Development Application Information Sheet for Proponent

Sydney Water has provided advice to the Department/Council on your proposed development. Further steps are required before Sydney Water connections and final approvals can be granted. Without relevant Sydney Water approval, your Subdivision Certificate or Occupation Certificate, Construction Certificate, may not be issued. Please read the information below to assist with your development. Further information can also be found on our website (sydneywater.com.au).

Building Plan Approval

Why have I been advised a Building Plan Approval?

Demolition, excavation, construction or modification to existing buildings and structures all have the potential to damage or limit access to our water, wastewater or stormwater services. That's why we need to review and approve your building plans before you start any work. In many cases, you need a Building Plan Approval before council can allow you to start demolishing or constructing.

How do I apply for a Building Plan Approval?

The approved plans must be submitted to the Sydney Water [Tap in®](#) online service to determine whether the development will affect any Sydney Water wastewater, water, stormwater mains and/or easement, and if further requirements need to be met.

Sydney Water recommends you apply for Building Plan approval early as in some instances a detailed engineering assessment would be required when building over or near our critical assets. This can be a lengthy process and may also impact development designs.

You will be required to pay Sydney Water for the costs associated with any detailed review.

Section 73 Compliance Certificate

Why have I been advised a Section 73 application?

If you are developing or subdividing land and needing water or wastewater, you may need to apply for a Section 73 Compliance Certificate before council can issue an Occupation or Subdivision Certificate.

If we have noted a requirement for a Section 73 Compliance Certificate in our advice to Council, one must be obtained from Sydney Water under the *Sydney Water Act 1994*. These include secondary homes or granny flats in an area with Priority Sewerage Scheme or with a GFA greater than 60 m².

How do I apply for a Section 73 Compliance Certificate?

You can choose to use a water servicing coordinator for works of any size. If you only have minor works, you can apply directly through Sydney Water Developer Direct.

We suggest you lodge an early application for the certificate, as there may be additional connections or pipes to be built or additional steps to protect our existing assets. This can also impact other services, buildings, driveways, or landscape designs.

Feasibility

Why have I been advised to carry out a Feasibility enquiry?

If the development presents potentially large water servicing demands on drinking water, wastewater, recycled water and stormwater where applicable or asset impacts are anticipated, further investigation may be required to determine the servicing requirements for the site.

It is recommended that a Water Servicing Coordinator is engaged to ensure early discussion on your proposed development so it is considered in any potential planning that we might be undertaking. We advise you do this as soon as possible to prevent potential delays to your development approvals or servicing.

How do I apply for a Feasibility?

To apply for a Feasibility, you will need to contact a Water Servicing Coordinator. Tell them you have been advised to lodge a Feasibility as part of your development application.

Growth Data Form

Why do I need to complete a Growth Data Form as part of the Feasibility application?

If you have been requested to provide growth data, it is likely your planning proposal may lead to development with significant servicing needs, especially in areas not previously identified for substantial growth. To ensure thorough servicing advice and explore staged servicing options, we need anticipated growth data and indicative development staging, including yield per stage, as specified in the Growth Data Form in Appendix 1 of this information sheet.

Infrastructure Contributions

What are infrastructure contributions?

Infrastructure contributions are a payment towards the cost of infrastructure needed to provide water-related services to new developments. The contributions are set to be reintroduced by Sydney Water from 1 July 2024 followed a decision by the NSW Government.

Please note existing charges still apply for the recycled water schemes provided by Sydney Water.

How do infrastructure contributions impact me?

Infrastructure contributions for drinking water and wastewater will be payable for all developments that require a Section 73 Compliance Certificate to be issued from 1 July 2024 onwards. The contributions will be gradually reintroduced such that they will be capped at 25 percent in 2024-25 and 50 percent in 2025-26, with full contributions payable from 1 July 2026 onwards, in line with a transition plan approved by the NSW Government.

You can find more information on the reintroduction of drinking water and wastewater contributions at [Infrastructure contributions | Sydney Water Talk](#).

I am building in the Western Sydney Aerotropolis Precincts. How does this impact me?

The NSW Government has appointed Sydney Water as the Regional Stormwater Authority in the initial Western Sydney Aerotropolis precincts, including the Mamre Road Precinct.

If you are building in the Aerotropolis Initial Precincts, you will be required to pay infrastructure contributions towards Sydney Water's stormwater and recycled water servicing. The estimated amount of contributions for stormwater and recycled water servicing will be provided at the Notice of Requirements issued during the Section 73 application.

You can find more information on Mamre Road and Aerotropolis Infrastructure Contributions at [Mamre Road and Aerotropolis development](#).

Water Servicing Coordinator

What is a Water Servicing Coordinator?

Water Servicing Coordinators are accredited providers who can manage your Sydney Water applications for you.

They can design new pipes, manage applications for Section 73 Compliance Certificates and Feasibilities, applications for approval to move or extend our pipes, design and construction of new pipes, and applications for approval to build over or next to assets.

All Water Servicing Coordinators have designer accreditation and can provide design services.

How do I find a Water Servicing Coordinator?

Trade wastewater for business customers

I am a business customer and my development may generate commercial or industrial trade wastewater. What do I do?

If your development is going to generate trade wastewater, you must have written approval to connect your business to our network, and properly install and maintain appropriate treatment equipment before any business activities can commence. It is illegal to discharge trade wastewater into the Sydney Water sewerage system without permission.

How to apply for approval to discharge?

Complete an application for connection to discharge trade wastewater at Sydney Water [Tap in®](#) or contact businesscustomers@sydneywater.com.au for further information.

Appendix 1. Example of growth data form

The following is an example of the level of intel that we require to assess the potential staging and phasing of asset upgrades. We acknowledge that this information is an indication only and is provided as a guide to assist SW to provide more nuanced feasibility or servicing advice. We note that timescales are often subject to developer intent/demand and approval timescales. Sydney Water uses the information at its own risk.

Growth forecast																	
Project name	Address+ Reference number																
Development Type	Ultimate proposed new growth	Total # stages	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035	2036	continue as required
