Re: Support for Junction Rivers proposed by Windlab submission

To Tatsiana Bandaruk

Qantac is pleased to express our support in providing accommodation for Windlab's Junction Rivers Wind Project. With our proven capability in providing large-scale accommodation solutions, we are well-positioned to support Windlab in housing its workforce temporarily during the construction phase, which we understand is indicatively 250 on average, with a peak of 400. We have a permanent Development Application approval for 400 beds, which we are in discussions with Council to expand to 500.

We understand the challenges posed by the project's remote location and are prepared to offer flexible, scalable accommodation solutions to meet Windlab's needs. Our recent experience in successfully accommodating personnel for EnergyConnect highlights our readiness and ability to assist Windlab once it starts its construction activities targeted in H2 2026.

We are committed to working closely with Windlab to ensure the smooth implementation of accommodation arrangements upon the project's approval. Please take this letter as confirmation of Qantac's commitment to offer necessary support.

We look forward to contributing to the success of the Junction Rivers Wind Project.

Regards
