Subject: NWRL Effect on Beecroft and Cheltenham Residents

The NSW Government released on the 29 October 2012 the Second Environmental Impact Statement (EIS2) for the North West Rail Link (NWRL)

EIS2 confirms that the NWRL will greatly disrupt passengers boarding the Northern Line at Hornsby, Normanhurst, Thornleigh, Pennant Hills, Beecroft and Cheltenham (who currently enjoy a direct run into the city on one train taking about 40 minutes from Cheltenham) will be forced to change at Epping for a single deck train. At Chatswood, they will then need to wait and change again, back to a double deck train to get to the CBD. That means having to get three trains into the city rather than the one seamless system they enjoy now. The introduction of this incompatible component is unacceptable.

Minister Berejiklian omits the fact that this will create great disruption for existing customers on the Northern Line who will be forced to change trains at Epping and then change at Chatswood where they will inevitably have to wait for connection to a double deck train to the CBD.

Lodge your objection to EIS2 by December 3-2012 using the following:

JIM VANDORE
 Name & Address..... 6/168 BEECROFT ROAD, CHELTENHAM, 2119.
 The Name of your application..... PROTEST
 Application number SSI-5414

A brief statement (in support or your objection to the proposal)

This is supposed to be a world class city. The decision to offer NW Rail users a service requiring two changes is third world thinking.

Your reason(s) (for supporting or objecting to the proposal)

The proposal is unreasonable, enraging and plain stupid. Why should NW people be disadvantaged in this way?
