This is a submission to the Hume Coal Project SSD 7172

I object to this project and recommend that it be rejected.

Having a Coal Mine and Open Cut Mine in an area of farming is putting our health at risk, storing coal piles is the most dangerous thing that could be allowed, we have tank water, roofs can not be polluted for clean water animals suffer in our pastures, water dams for our farms, we have high winds nothing will stop anything in 85 to 90 km, winds that is what we have had each year. Water is the most valuable and precious to have for survival of any species for life, to put a clean and green town of thousands of peoples lives at risk for dirty coal that you can't eat for food is unthinkable, please listen to the people we don't want it and we pray for common sense for the future of the area and the planet for future farming produce. Water and food should be a priority over anything else. My ancestors told me to protect this land I walk on as we are the caretakers. I have not made any reportable political donations in the previous 2 years.

I ask the Government to reject this project
