**RE: ROOF FINISH
ST ANTHONY OF PADUA CATHOLIC SCHOOL, AUSTRAL**

Dear Greg

Munns Sly Moore Architects (MSMa) provide the following confirmation of the proposed roof finish in response to ESD/Heat Island comments from the NSW Department of Planning, Industry and Environment to the Draft Response to Submissions (RTS).

Drawing A901 - External Finishes Schedule has been updated to include proposed roof finish of Colorbond 'Surfmist'. We confirm the proposed colour has the following properties:

- Solar Absorptance (SA) - 0.32
- BCA Classification - Light

The proposed roof - and its properties - are in accordance with the recommendations of part 6.2.1 *Roof Material with High Solar Reflect Index* of the ESD Report.

Should you wish to discuss any of the above, please contact Erik Innes on 6248 8922.

Yours sincerely,
MUNNS SLY MOORE ARCHITECTS PTY LTD

ERIK INNES FRAIA
